

Fire Reels

Quality hose reels designed specifically for the fire industry

QUALITY WHEN IT MATTERS MOST

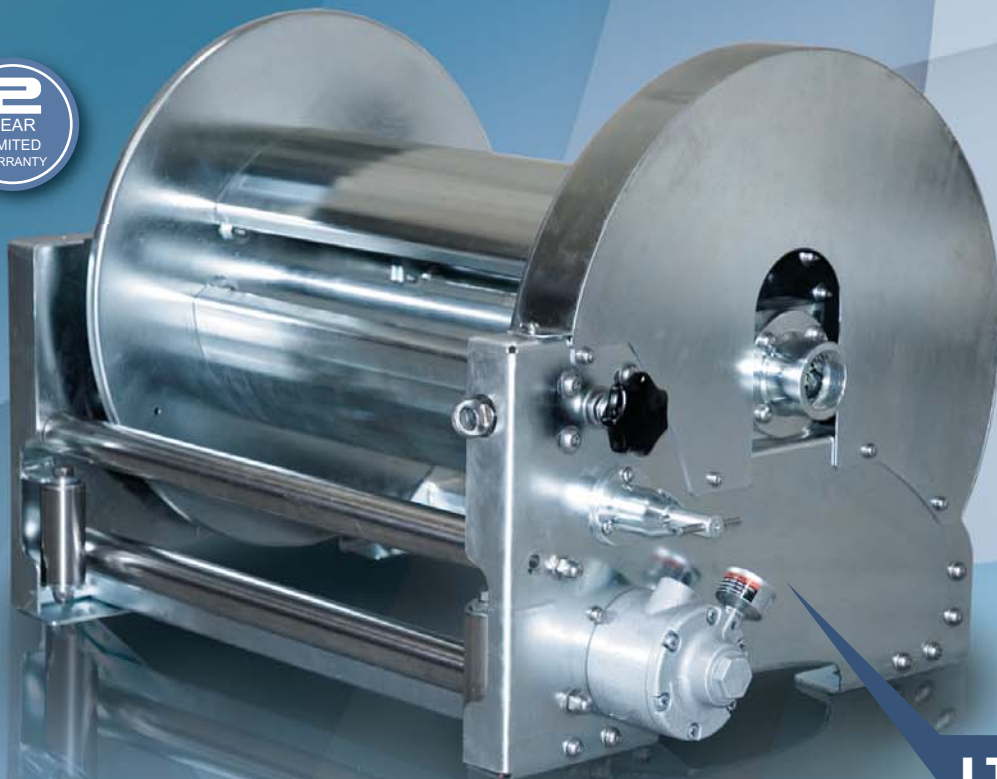

Fire Reels

QUALITY WHEN IT MATTERS MOST

Why Reelcare fire reels are the best choice to make?

Reelcare hose reels have been designed to perform and last in the toughest conditions.

- All our fire reels are made to specific requirements.
- Full flow fluid path, designed with no flow restrictions.
- Our reels come with a 24 month warranty.
- The best quality after sales care and servicing.

LT SERIES

DISENGAGEABLE AUXILIARY REWIND

The manual rewind system disengages completely whilst the reel is in use; it is only engaged when the operator requires it. This system means that the drum can run freely with only the motor drive engaged, reducing any drag that would be caused by conventional bevel rewind systems.

GEARED REWIND MECHANISM

Pneumatic motor with direct drive geared rewind does away with chain and sprocket technology.

MEETS EU SAFETY REQUIREMENTS

We supply all the necessary guards on the gear and drive system to protect the operator and fulfill all EU safety requirements.

STAINLESS STEEL FASTENERS

The reels are fitted throughout with stainless steel fasteners to give added corrosion resistance.

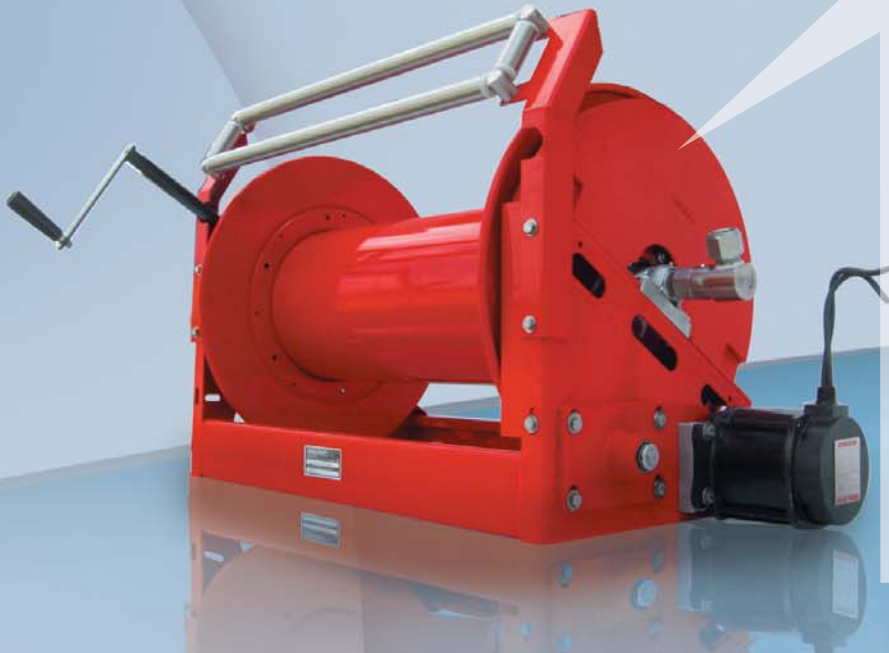

INNOVATIVE ROLLER DESIGN

Stainless steel roller guides with horizontal rollers that are set back to aid branch stowage. The rollers are mounted on bearings rather than traditional bushes, this helps the rollers to spin more freely and improve operation.

HEAVY DUTY LOCK PIN

A fixed heavy duty spring loaded pin lock, solidly locks the reel in position when not in use, or in transit.

SERIES 2400

SERIES 2400 - Large Frame Technical Features

- Holds up to 91m of 1" hose I.D.
- Optional sloping frame allows the reel to be mounted in a high or low position.
- Safety features include centrifugal clutch and idler gear.
- Reels have a durable powder coat finish as standard but are also available in aluminium, galvanised steel and stainless steel for specialist applications
- Available in various sizes to suit your installation.

SERIES 1200 - Heavy Duty Technical Features

- Holds up to 70m of 1" hose I.D.
- Auxiliary bevel rewind.
- Available in various sizes to suit your installation.
- Strong yet compact for efficient use of vehicle space
- Reels have a durable powder coat finish as standard but are also available in aluminium, galvanised steel and stainless steel for specialist applications

SERIES 1200

SERIES 30000

SERIES 30000 - Compact Technical Features

- A complete range of compact reels for a wide variety of fire applications
- Available to suit maximum lengths of the following hose sizes:

Length	300m	210m	150m	84m	53m
Hose I.D.	1/4"	3/8"	1/2"	3/4"	1"

Various motor options available on 1200, 2400 & 30000 Series

12V or 24V DC Electric motor • 4AM or 6AM Pneumatic motor • Hydraulic motor
