

GEN 4 SERIES

SG Range

Corrosion proof composite material

The Recoila GEN 4 is the ideal solution for small to medium workshop applications, where the size of the reel is important or short hose lengths are all that is required. The GEN 4 is manufactured from tough corrosion proof composite materials and extensive tests have shown it to be highly resistant to the vast majority of acids and alkalis. Typical uses for the GEN 4 are: service van's, under bench applications, assembly lines, etc. Each GEN 4 is supplied complete with a 1.5m connection hose.

FEATURES & BENEFITS

High Quality Finished Edge Spring

The GEN 4 boasts a high quality finished edge drive spring which virtually eliminates the possibility of drive spring failure due to micro cracks which occur on standard slit edge drive spring used on many hose reels.

Multi Position Locking Mechanism

The GEN 4 has a multi position locking mechanism which when released, provides a complete, positive retraction every time.

Modern Composite Materials

Manufactured from high grade virgin materials ensuring strength and longevity. UV stabilisers are added to offer extra protection against UV light reducing the possibility of hardening and cracking.

Mounting Brackets & Bosses

The three piece mounting system enables the reel to be attached and detached while the wall plate stays fitted in place.
