## LIGHTWEIGHT SPRING RETRACTABLE HOSE REEL

### User Friendly Latch Mechanism

The unique latch mechanism allows a complete retraction every time with no lock-out

### Kink Resistant Hose

High quality, industrial-grade kink resistant hose is specially blended compound for use on reels.

### Corrosion Resistance

All steel components are individually powder coated and are combined with composite materials to virtually eliminate corrosion.

### Structural Strength

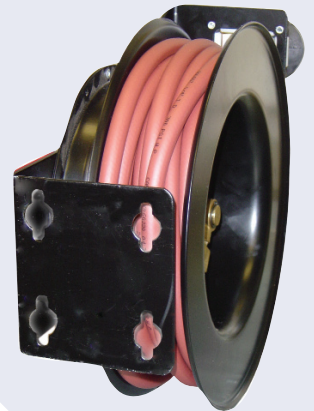

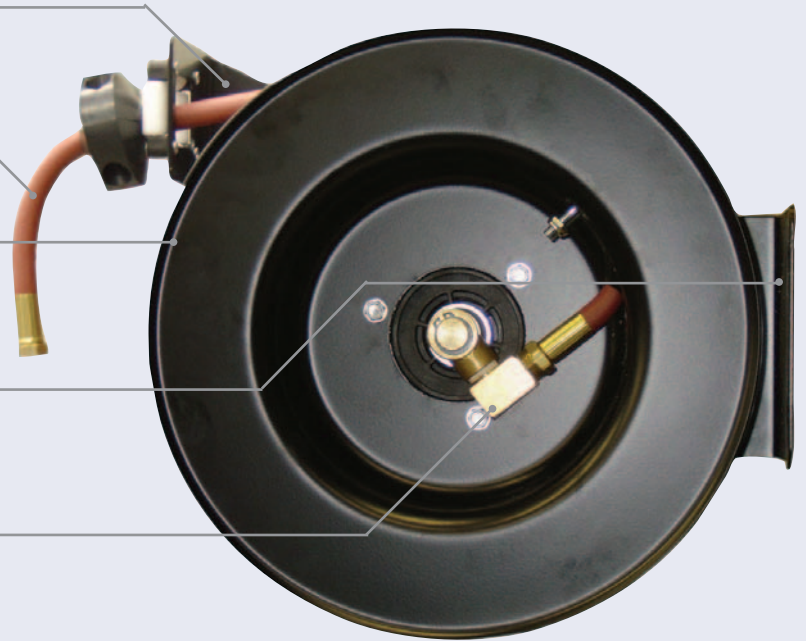

The base and guide arm are made of heavy gauge pressed steel to increase structural strength. Main shaft is 1" outside diameter (O.D.), cold-rolled steel.

### Proven Reduced Hose Stress

Industrial grade brass swivel is precision machined to reduce hose stress for a high life cycle.

### Easy to Mount

The base has four slotted holes for easy mounting and adjustment. The guide arm has 4 different positions to allowing the reel to be mounted virtually any where including pit, ceiling wall and floor.

### Industrial Solid Brass Swivel

The swivel is a critical part of the reel. Our high tolerance machining and best possible materials ensures long life with minimal service. The swivel is made from solid brass and has been engineered to reduce hose stress for a high life cycle.

### Technical Spec.

All reels have a maximum pressure of **20 BAR / 300 PSI**
