

# 7000 | SR Range

Designed for a variety of industrial applications the 7000 Series is an extremely robust range of hose reels and is ideal for the most demanding of applications. The base and the guide arm are formed from high-grade pressed steel and the engineered structural forms within these parts give the 7000 Series its strength. The standard low pressure hose reel is for air or water service only. The medium and high pressure reels are for oil and grease respectively.

The 7000 Series is also available in stainless steel and for welding, fuel and twin hydraulic applications.

# DP7000 | SR Range

Heavy duty reel with unique dual pedestal design DP7000 Series is a breakthrough in dual pedestal base hose reel design, Reelcare are able to offer the stability of a dual pedestal hose reel in a strong, superbly engineered and extremely compact design. The DP7000 Series features a patented interlocking base design, that makes the base assembly especially strong and resistant to heavy vibration. Independent testing has proven the DP7000 Series will stand up to rigorous truck or vehicle mounted applications.

## FEATURES & BENEFITS

### Strength & Stability

Interlocking dual base and guide arms are pressed from heavy gauge industrial steel and engineered components throughout make these reels strong and vibration resistant.

### Lightweight

Latch pawl, cam, and hubs are die-cast aluminium for superior strength and to eliminate excessive weight.

### Superior Corrosion-Resistance

A double adhesive gasket seals the spring case and steel parts are powder coated to provide excellent protection against weathering.

### Low Maintenance

Permanent oil impregnated bronze bushing and stainless steel torsion spring are incorporated to ensure that, through frequent use, these reels require minimal maintenance.

### Ease of Operation

The latch pawl is mounted on the guide arm to prevent latch out at full extension.
